

Instructions for HAL

1. Before 2026 Season starts

All PROs are invited to join HAL with 'Race Officer' level access. **DONE**

Each PRO is requested to enter the HAL site and set a password, etc (recommended on a desk top). On the opening page please click on the orange flag. This will open a link to download the HAL App to your phone.

This also ensures you have access to WhatsApp and the 'CCRC – Notice Board' where you will receive individual finish times (with supporting info on finishers, etc as SI 13.3) and publish the results for both NHC (Beta) and VPRS (Alpha) fleets.

2. After Racing

On completion of the racing (and before opening HAL), please record the following :

- Your name as PRO (not the committee boat)
- Wind Speed (Minimum knots)
- Wind Speed (Maximum knots)
- Wind Direction
- Race start time (as digital clock)
- Note down entered boats (that can be added to the App before entering the results)
- Record finished times (NOT elapsed) after analysis of boats before and after and any other cross checks for accuracy.

3. Entry on HAL

Open the HAL App on your phone or iPad

Click on Blue Box – New Results

Check the correct race is shown in the Blue Box, or scroll through to the correct day

Select race and click 'Enter Results'. Please note you are entering for both NHC and VPRS in one go – in tandem.

Enter race details on the next screen

Select first boat to enter results – hold screen rather than tap

And work through the racing fleet

And click 'Finish' – which takes you back to the first screen.

Now 'View Results'

This takes you to the NHC Result – does it look right ? Remember the handicap is adjusting up and down each race carried over from last season.

Toggle the NHC window and select VPRS to view the Alpha fleet results. This is linked to the single source of entered finish times.

You will see another option 'YTC Trial' which is running in the background for research this season.

4. Publishing Results

Go back to the first screen and click on 'Publish Results' (we are not emailing this season)

Select NHC and open in WhatsApp.

Select 'CCRC – Notice Board'

The default text is just the results for NHC. You can add text before and/or after if you wish.

Repeat with VPRS as a separate post.

Please do **NOT** publish the YTC Trial

The results also simultaneously appear on the CCRC Website under 'Programme > Race Results'.

5. Post race review

The results you have published are 'preliminary'. I intend to have a check over and will speak to the PRO if there appear to be any discrepancies as the season progresses.

Happy to help / run through the process if you contact me

Guy (R)

Results Officer
